8GB

Reliable Gaming and Multimedia Storage

Lexar offers a comprehensive line of award-winning memory cards in various speeds, formats, and capacities. With so many options, it's easy to find the right Lexar® solution to fit your needs and lifestyle.

The Lexar Gaming SDHC™ card is specifically designed for gamers using a Nintendo® Wii™* console or DSi™ handheld device. It allows you to store loads of gaming data, multimedia files, and more. The card is available in 4GB and 8GB capacities.

Take Gaming to the Next Level

Maximize Your Gaming Experience with High-Capacity Storage. The high-capacity Lexar Gaming SDHC card lets you unleash the power of your Nintendo Wii and DSi systems. The card gives you the ability to store more gaming-related content, so you can save your progress in a game, keep custom settings, and safeguard your high scores. You can also download games from the Nintendo DSi Shop and store them directly on your Lexar Gaming SDHC card for ultimate convenience.

Do More with Your Multimedia. The Lexar Gaming SDHC card allows you to reliably transfer, store, and play your favorite gaming and multimedia content. What's more, the card allows you to snap and store more photos using the two built-in cameras in your DSi handheld device, and it lets you store and play back songs and video, as well. So in addition to storing all your gaming data, the Lexar Gaming SDHC card is a great place to keep your multimedia files—music, movies, photos, video, Internet favorites, and more.

Trusted Lexar Performance and Reliability. The Lexar Gaming SDHC card delivers performance you can depend on, ensuring your valuable gaming data is reliably downloaded and saved—so you can take gaming to the next level. Compatible with all SDHC-enabled devices, the card provides reliable, high-capacity storage for gaming, multimedia, and more—making it an excellent solution to your gaming needs and beyond.

Lexar. When Memory Matters.™

*Wii Menu 4.0 required

WARNING: Secure Digital High Capacity (SDHC) memory cards are only compatible with devices that support the SDHC format. Actual usable memory capacity may vary. 1GB equals 1 billion bytes.
